Who plays these 2D platform brawlers in the age of Battle Royale? The concept is ok tho. You choose between a few animal characters, select from roles (loadouts) from ninja to mad scientists and play on 8 different maps with up to 4 players. It's F2P and you can share one keyboard for 2 players to do the achievements (local coop).. It's incredibly fun, and infuriating, now my friends hate me D:. este juego es tan pija que volvi a matar a nisman. its fun for the first 15 minutes, but already then you will realize how op some of the weapons are. how all the maps are almost similar. and how little went in to the controls.. pinche juego juego culero ni deja cambiar los controles ya ni brawhalla alvperro de ni con mi gtx 1060 me corre bien ni a 640 x 480 no le entiendes ni madres no lo compren ni siquiera la gente lo juego y si lo juegan son puro pinche vietnamina alv. in the latest couple of years Super mario brothers 2 has been the game of the year but now i think i finally found it's competetitor, yes this game will rival Supaaaaa mariooo brothas 2 with this discovery i can finally end my life and rest in piece and if you don't believe

that this game is a contender for the game of eons then just try it yourself unlike EA games this si completely free so go get em tiger!. played for literally 20 minutes and had 0 fun.. Do you like super smash bros? Do you wish it existed for pc? Do you hate animals? Well this game is just for you!. Got the game for \$0.49. Got \$0.49 of fun. A pretty good buy if you want to play couch coop but I bought the game for the online multiplayer which is either broken or dead. Honestly can't justify a thumbs down.
