planetbound

There are many other "Pyramid Solitaire with power-ups" games, and this isn't the worst. In fact it's one of the most enjoyable. It's not too hard, it's not too long, it's full of (easy) humor, the music is spot-on, there are only a few bugs (mostly an underpolished UI) and the graphics take some time getting used to, especially on the cards themselves. Good for a bundle/cheap purchase.. Great old school RPG. Graphics send you back to the dawn of the great old RPG's, but better. Story, characters, exploration and combat are all great. Built in editor is a plus for those tough battles. Highly recommended.. god is dead and this is why. Really really good gameplay, different game modes means hours of playing without getting bored, lots of fun!

BUT

There's no option to play in a group with my friend, so i don't often get to work with them in a team, which is the main reason I bought this game. It says that "Friends" is coming soon, but i've had this game for a while now and still no option to easily play on the same team. I hope that the devs will sort this out very soon.. A very solid JRPG that I enjoyed quite bit. Good story? Check. Good cast? Check. Good RPG mechanics and battle system? Check. Only flaws are dungeons can drag on quite bit and map design is all over the place with excessive clutter. The game was still very easy even on hard difficulty except for last boss and optional arena fight.. It's a squad command game, and if it was the only around in its day then it would have been pretty cool. However, it absolutely does not stand the test of time. Antiquated mechanics and a resolution that maxes at 1024 really make this game not worth anyone's time. Go play the legendary Arma 3. Delta Force Land Warrior is a fun tactical first-person shooter that despite some small issues remains as a good game that is worth your time .

Final Score : 7/10 (Good)

As a long-time fan of the Point&Click adventure game (starting with Sierra's King's Quest series), I have to say this game is disappointing. Whereas some P&Cs offer multiple solutions to puzzles, Alternativa seems to only have one solution. What's worse is that the solutions don't always make much sense. There's also a lot of back and forth, from point A to B and back to A, before you can go from B to C. If you try to use two items together before experiencing a pointless conversation with an apparently unrelated character, nothing happens. After you talk to someone you have absolutely no reason to talk to, those items work together perfectly. Good effort, poor execution.. Long ago, nearly a decade in fact, I played this game and its siblings on Kongregate.com. When I discovered they existed on Steam I knew I had to actually buy them. I played for hours back in the day and these days its no different. I love these games. They're perfect for the OCD commander who just has to put every map on lockdown before finishing the job. Want to turn the whole map green? Go for it! Just want to rush to the totems and bail out for a high score? That's cool too. Me? I'm never in a hurry to get done. I savor each and every map, locking down the Creeper in the emitters and turning the map completely green. I realize it's not a game for everyone, and that perhaps it can get a bit repetitious when you're getting near the end, but give it a shot. You might love it too. The addition of an actual story really helped, as the original was... well, a prototype. A project thrown together by someone who had no idea whether anyone would even play his game or if it'd just fade into obscurity. Clearly it was a hit. Clearly he made it even better than the first time around.

Try it. It's good.. Both this and Bad Dream: Fever are wonderful games. Interesting and unusual adventure puzzles that often made me smile when I figured them out. I can't wait to see more from this developer!. Pretty much the only game you can get shoted in the face with bazzoka and survive. It's pretty good as long as you don't play it.
