10/10

1. Came in expecting some lame-o Bejeweled clone that I might get a refund later.
2. Nope, no refund needed. Asides from the match-3 mechanic, this game is nothing like Bejeweled.
3. It's match-3 plus grid-based tactic, plus a little JRPG, plus cutesy graphic.
4. Oh and did I mention boss fights? Its boss fights are one of a kind,
5. I've only just beaten OWLNET (4th stage) so far, but the level design really made me go through every single corner of the areas and grind the items I need in order to (successfully) beat the end-boss.
6. That feeling when you finally did it after 10+ rounds, is just like when you beaten a Dark Souls boss where, they didn't make it intentionally hard, but you can beat it if you know exactly what you're doing.
7. My only complain was that it didn't have controller support.. Great loco with nice sounds that is seen all over the uk network. After all I have endured and gathered from the initial games this takes them all away and adds a very frustrating prison escape as well. Whats the point of getting artifacts in the last minute after defeating eredar, collecting all the lore books getting 50 mobs in the book when you loose it all and then getting beaten up by tedeous thugs just because you have nothing at all. no thanks. Fun Arcade Game! Yesssss!. The Sniper Vr is a very very cool game also with that small touch of realism that you love, the controls are smooth and the Devs are very responsive in trying to help you with whatever you need.

[The link shows my gameplay of it and also from what i know the latest patch during the first mission i play there is 3 min where i was needed to do something for family just skip that.](#)

[Over all 4/5 great but obvi bugs that they are working out as you read this.. Cute. Fun. and easy. Manages to be short and sweet without getting annoying.. I got this for .10€ I can't really complain.](#)

[More of a meme than a game.](#)

[Edit: Salty cucks getting mad that I'm not complaining for purchasing a 10€ game. It's literally a dime. Get over it.. If you want to know what the game is about and how it works there's plenty other reviews, i'm just giving an overview of the current state of the game.](#)

[While there may have been some issues. \(read older negative reviews\) the dev is really on top of things and has been consistently improving and expanding upon the game. Active in the community and very responsive to all kinds of feedback.](#)

[Pretty much all issues have been ironed out. currently it's mostly content updates and minor quality of life improvements. with patches rolling out almost daily.](#)

[I would have given the game a negative review a week or two ago. due to the state of the game. but that's no longer true. It deserves a big fat recommendation. for a big part due to the devs active involvement.](#)

Paintball is really fun!. UGH! I cant even get passed the first mission the dumpster fire wont go out. Was playing this today and was really enjoying it ! HOWEVER.. I caught a bug that didnt allow me to click on any of my units, This was a brand new turn and they all had plenty of AP. I seen comments on how others were having this issue. But i understand this is still in Beta and the devs are still ironing out this kinks, which is why i decided to give my feedback. But I do really look forward to this game once completed, its great ! Any Heroscape, RPG, Tabletop, Magic, or D&D enthusiast will love this game. Check it out !. This was a pretty cute VN.

I wasn't actually expecting to learn things about Japan though.

There is a lot of information mixed in, from festivals to types of mochi to Comiket.

It would have been nice to the see the routes taken a bit further, but it's still a nice story.

My only nit-pick is that there didn't seem to be any sound options, so at times the music would drown out the voice acting.

Oh, and the Neko mode was a nice touch.. I love all of these games except Panocopia freezes when it gets to a certain spot and I cannot get out of it. I have uninstalled the package and reinstalled it and it still does not work. Very disappointing.. Computer clicking simulator.

10V10 buy now before it's twice the price. Probabily one of the best games i have ever played on Steam, honestly. The story is really good, the graphics are simple and the controls are pretty easy. It's a must buy.. Pretty much the only game you can get shoted in the face with bazzoka and survive. Was good the first 10 minutes but then got incredibly repetitive and boring, save your money \$\$.
